

ACUTE PAEDIATRICS WORKSHOP

SUNDAY 11 SEPTEMBER

1300 – 1700

Please join our international, multi-disciplinary faculty for a deep dive into paediatric critical illness. An individual episode of paediatric critical illness pushes us all to the limit and in the debrief that follows, it's often hard to believe that there are recurring themes at play. We aim to uncover some of these themes and in doing so, help make things safer for your smallest patients.

SESSION 1	
1300	Lessons learnt from paediatric morbidity and mortality Fran Lockie
1320	Communication in a crisis Jacque Schutz
1340	PIMS-TS a clinical update Alison Boast
1400	Top tips for stabilisation-paediatric critical care nursing Tony Norris & Jacintha Pickles
1430	Codachrome: seeing red over green vomits? Warwick Teague
BREAK (1500 – 1530)	
SESSION 2	
1530	Sepsis in the ED - a case-based review Elliot Long
1550	Getting \$%^# done - establishing a paediatric ECMO service Krista Mos
1610	Training in paediatric emergency medicine- a global perspective Charlotte Harper
1630	Paediatric critical care in a unique environment Jacintha Pickles
1650	Panel discussion

Fran Lockie

Dr Fran Lockie MBBS, BSc (hons), MRCPCH, FRACP Senior consultant in Paediatric Emergency Medicine (PEM), Women's and Children's Hospital (WCH), Adelaide Consultant and Acting Head of Unit MedSTAR Kids, Pre-Hospital and Retrieval Medicine, MedSTAR Emergency Medical Retrieval Service.

Dr Francis Lockie is a paediatric emergency specialist and retrieval physician. Early experiences at the Trauma Unit at Cook County Hospital, Chicago and at St Mary's Hospital during the 2005 London bombings reinforced his interest in acute care paediatrics. He trained in London before moving to Sydney to work for NSW paediatric and neonatal transport service (NETS) and complete his training in paediatric emergency medicine. He worked on the faculty at Sydney Children's and British Columbia (BC) Children's Hospitals

CODA 22

11-14 SEPTEMBER MELBOURNE

before moving to Adelaide to take up a combined position in PEM and paediatric & neonatal retrieval. He is interested in emergency airway management and currently chairs the WCH airway safety group. He is an active APLS instructor and enjoys teaching on the annual instructor course in Sri Lanka. Fran deployed to Samoa for the measles crisis with the Australian Medical Assistance Team (AUSMAT) and also runs the safety and quality programme for PED. He lectures nationally and internationally on paediatric emergencies and retrieval. Fran lives in Adelaide with his wife and three children.
